

NEW LAUNCHES

EliteAAA

Key Features: Browser-based management interface, supports multiple service and business models - wireless or wireline Internet access, outsourced remote access, managed VPNs, broadband, VoIP, or any combination of services, performs 1000 transactions per second.

Elitecore Technologies, a provider of telecom OSS BSS system for next generation voice, video and data services, has launched its EliteAAA appliance from its CRESTEL division. Elitecore has a proven domain expertise in the AAA market having satisfied customer base in India and APAC.

EliteAAA is the answer to the growing access control, service delivery and accounting requirements of carriers, service providers, and wireless operators. EliteAAA centrally manages the authentication of the subscribers, authorizes them for appropriate level of service, and ensures reliable accounting of their usage. In addition to the authentication, authorization and accounting functionality required by other types of networks, WIMAX AAA system requires the intelligence and performance to manage mobility and roaming. EliteAAA supports multi-services and is NWG 1.2 compliant for Mobile WiMAX networks.

Elitecore AAA in a box solution offers great convenience to service providers through reduced implementation costs and slashes setup times, reduced maintenance, thereby lowering service provider's administrative burden. EliteAAA appliance is on

Intel platform and gives a performance of 1000 transactions per second. It will come in various versions from 500 ports to 50,000 ports. Its simple to configure and maintain browser-based management interface provides a secure console to remotely configure any of the local server settings.

EliteAAA supports multiple service and business models be it wireless or wireline Internet access, outsourced remote access, managed VPNs, broadband, VoIP, or any combination of services.

EliteAAA

“AAA has huge market potential in the telecom market as Next Gen technology savvy users access the network from a wide variety of access points and through a wide variety of devices. AAA market is forecasted to reach USD 13.3 billion (Rs. 63,840 crore) by 2011. With proven deployments with leading telecom operators across the globe, we are very optimistic about our presence in the AAA market.”

Nikhil Jain,
COO & Director, Elitecore
